### PROFILE

Product-focused full-stack developer who turns unclear needs into shipped web apps, dashboards and automations. Founder of Gainzzoo, a fitness product built idea-to-production — product decisions, frontend, backend, deployment and iteration. TypeScript-first (Vue/React, Node/Express, MongoDB, Docker, CI/CD). I use AI to accelerate research, prototyping and debugging while keeping code quality, testing and security under human review.

### EXPERIENCE

#### Founder & Full-Stack Developer

Nov 2025 — Present

##### Gainzzoo

- Building a fitness coaching product end-to-end: mobile app, coach studio, marketing site and API (4 surfaces).
- Own product, frontend, backend, database, infra and deployment solo — Vue 3 / Capacitor, Express 5 / TypeScript, MongoDB, Docker, nginx, GitLab CI.
- Design user flows around training habits, progress and adherence; iterate from real coach & athlete feedback.
- Shipped secure cookie-based auth and 3 locales (EN/FR/ES).

#### AI & Cybersecurity Apprentice

Sept 2024 — Jul 2025

##### Nokia — Paris

- Tech watch on AI & cybersecurity trends and their impact on products and organisations.
- Produced internal syntheses and presentations; translated technical topics for non-technical stakeholders.
- Supported cross-team discussions to clarify risks, opportunities and next steps.

#### Full-Stack Web Developer

Sept 2023 — Sept 2024

##### Snark Factory — Bordeaux

- Full-stack development for startup projects and internal tools with modern JS/TS.
- Delivered features from design to production, iterating with product and design.

#### Full-Stack Web Developer

Sept 2022 — Sept 2023

##### Le Vieux Monastère

- Full website redesign — modernised UI and structure.
- Built a custom lightweight CRM to streamline customer tracking and operations.

#### Junior Developer

Jun 2022 — Jul 2022

##### Orange — Bordeaux

- Built an Excel/VBA tool to track technical-team performance over large datasets, focused on reliability and security.

### SKILLS

TypeScript JavaScript Vue 3 React  
Node.js Express MongoDB  
REST APIs Docker nginx  
GitLab CI / GitHub CI/CD Capacitor  
Cloudflare R2 UI/UX Automation  
AI-assisted dev GDPR basics

### EDUCATION

#### Epitech — MSc Pro 1

Paris · 2024–2025

#### BUT Multimedia & Internet (MMI)

IUT Bordeaux Montaigne · 2022–2024
